On the distribution of reciprocal and reflexive anaphors in Hungarian: Subject and possessor anaphors

György Rákosi
University of Debrecen

The Hungarian reciprocal *egymás* "each other", the reflexive *maga* "himself" and the more complex reflexive *önmaga* "himself" have the following distribution.

HUNGARIAN	matrix subject	subordinate subject	possessor
egymás "each other"	*	*	√
maga "himself"	*	*	√
önmaga "himself"	√	√	√

In this talk, I will investigate the factors that underlie this distribution.
